EXPERIENCE

Flutter Developer

Footz

Mar 2023

UAE

- Created and implemented custom UI elements that enhanced the user experience.
- Focused on user-centered design principles, ensuring ease of navigation and interaction.

PROJECTS

Echo | Flutter, Firebase, Riverpod

2024

- Implemented functionality for users to create and share posts, including options for likes, comments, and sharing.
- Developed a feature allowing users to share moment with their followers.
- Designed a real-time messaging system with additional capabilities.
- Integrated the ability for users to leave voice comments on posts, offering a personalized and interactive way to engage with content.

Insta Clone | Flutter, Firebase, Riverpod

2023

- Built an Instagram-like social media app which is used Firebase for backend services and Riverpod for state management.
- Implemented features allowing users to follow/unfollow other users and post images.

Hamro College | Flutter, Firebase, Riverpod

2023

- Developed an app with both admin and user views. In the admin web view, features include taking attendance, assigning assignments, grading assessments, and posting events.
- In the mobile user view, students can view attendance records, assignments, assessment marks, and upcoming events posted by the admin.

ECOMMERCE | Flutter, Firebase, Riverpod

2023

- Created an e-commerce app with distinct views for admin and user. In the admin web view, items can be posted with detailed information, including price, descriptions, and images.
- In the user view, customers can browse and view posted items.

Covid Tracker | Flutter, Firebase

2023

- Built a Covid-19 tracking application utilizing an API to display data on cured, deceased, and infected individuals in specific countries.
